PRESS RELEASE

Detroit Testing Laboratory, Inc. opens DTL Melbourne Facility

November 15, 2009

Detroit Testing Laboratory, Inc., a leading automotive and industrial testing and development laboratory, announces that it has opened its newest testing laboratory in Melbourne, Florida. The new facility, named DTL Melbourne, began operations in early November..

DTL Melbourne, which is a partnership between Detroit Testing Laboratory, Inc. (DTL) and Rubicom, a Division of Advanced Compliance Solutions, Inc. (ACS), will offer Environmental and Vibration/Shock testing in addition to the EMC testing services offered by Rubicom. DTL Melbourne will be housed within a 12,000 square foot shared facility with Rubicom.

“ACS has been pursuing the additional testing capability this partnership brings for several years. Our EMC testing for Military and Aerospace customers goes hand in hand with Environmental and Dynamics Testing and we’ve been anxious to be able to provide a more fully rounded service under one roof to our clients”, stated ACS President, Scott Proffitt. “ It was important to us and our clients that our partner in this effort be of the same caliber of professionalism, integrity and measurement accuracy as Rubicom. We’ve found that DTL, with over 100 years of experience in testing, exceeds our expectations and we are confident the synergies of this partnership will be a great benefit to our clients.”

DTL Chairman & CEO, Alfredo Apolloni stated, “This partnership with Rubicom will allow DTL to achieve its goal to expand its market presence into the southern US. As a company with a long history of testing for the Military and Aerospace industry in the US, we felt it was the right time to bring our industry-leading experience and expertise to this region. This partnership will allow the customers in Melbourne and the surrounding area in Florida to have a single supplier that offers industry leading quality, unmatched customer service and cost-effective pricing. We expect the impact for our customers will be immediate and dramatic. “
